To Whom It May Concern:

Infringement Notification:

The May issue of *C/C++ Users Journal*, published by CMP Media LLC and copyright 2002 CMP Media LLC, includes the following article:

Title: The Boost.Threads Library
Author: Bill Kempf
Pages: 6 – 13

The article has also been posted to the *C/C++ Users Journal* website: www.cuj.com, currently at

<http://cuj.com/current/feature.htm?topic=current>

again copyright 2002 CMP Media LLC.

This material has now been posted and archived without permission in the Google group:

comp.programming.threads

in the thread:

CUJ/ "The Boost Threads Library" article.

in the following message:

Message-ID: 3CB14C2F.349AEF75@web.de

from [REDACTED], dated 8 April 2002.

As publisher of the *C/C++ Users Journal*, I am entering a formal notice of copyright infringement. In support of this allegation, I am including here a copy of the Contents

page from the May issue of *C/C++ Users Journal*, which shows both the article and the copyright notice. Further, I have consulted with CMP Media LLC's legal counsel, [REDACTED], who confirms that our copyright has been violated by [REDACTED]'s posting.

Of interest also is the fact that in a separate message thread within comp.programming.threads:

[FYI]Re: CUJ/ "The Boost Threads Library" article

several posters point out to [REDACTED] that he has violated copyright.

I have a good faith belief that use of the copyrighted materials described above on the allegedly infringing web page (posting) is not authorized by the copyright owner, its agent, or the law.

I swear, under penalty of perjury, that the information in the notification is accurate and that I am the copyright owner or am authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.

I request that you investigate my allegation of this infringement and take the appropriate measures.

I thank you for your consideration and will be glad to answer any questions you may have.

Sincerely,

[REDACTED]
Publisher, *C/C++ Users Journal*

Vol. 20, No. 5

MULTITHREADING

6 The Boost.Threads Library

Bill Kempf

Standard C++ threads are imminent. CUJ predicts they will derive from the Boost.Threads library, explored here by the eminent author.

14 A Per-Thread Singleton Class

Puneesh Chaudhry

A refreshing look at an old pattern.

20 Refactoring Global Objects in Multithreaded Applications

Patrick Tennberg

Although you may get fired for introducing any new global variables, it's too much work to rewrite old code to remove them. So make them thread-safe and stop worrying.
