As is immediately evident, these sites have as their primary purpose the dissemination of illegally modified ("cracked") versions of software products. By providing query services over these web sites, Google, Inc. is actively participating in the piracy of a large number of copyrighted commercial software products, including the distribution of unlicensed, illegally modified versions of our XenoCode product.

To avoid the possibility of legal action, the web sites indicated above should be promptly removed from your index. Please notify us via paper or electronic mail of your response so that we may confirm that the infringing search results are no longer present.

I have a good faith belief that use of the copyrighted materials described above on the allegedly infringing web pages is not authorized by the copyright owner, its agent, or the law.

I swear, under penalty of perjury, that the information in the notification is accurate and that I am the copyright owner or am authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.

Sincerely,
