Sirs;

I require your immediate help concerning a number of websites that have stolen our page copy and despite two written warnings to make the changes, they have refused to remove our copy. Our URL is: <http://www.joanofquark.com>. The URLs that have illegally used our copy and failed, upon legal notice to remove it from their sites are:

<http://www.webbangladesh.net/design.php>  
[http://www.eimpressions.com.au/graphic\\_design.php](http://www.eimpressions.com.au/graphic_design.php)  
<http://www.iegraphics.com/services/print-branding.html>  
<http://www.miamidigitalstudios.com/objectives.aspx>  
<http://www.webdesigners4u.com/graphics-design/>  
[http://www.futerox.com/web\\_design\\_portfolio.asp](http://www.futerox.com/web_design_portfolio.asp)

The email contacts for these sites are as follows:

[REDACTED]@webbangladesh.com  
[REDACTED]@eimpressions.com.au  
[REDACTED]@iegraphics.com  
[REDACTED]@verticalmarketing.biz (www.miamidigitalstudios.com)  
[REDACTED]@webdesigners4u.com  
[REDACTED]@futerox.com

I have a good faith belief that the disputed use is not authorized by the copyright or intellectual property owner, my self, its agent, or the law.

I swear under penalty of perjury, consistent with U.S. Code Title 17, 512, that the above information in this Notice is accurate and that I am the copyright or intellectual property owner of the copy on my website.

Please kindly look into this at once and I ask that you delete their offending pages and/or their website from your database.

**"Web Design Pricing"** (their spelling which explains why they need to steal copy)

"Webbangladesh.net web site design and web development presents you a set of web site design offers tailored to your specific needs. Your particular specifications in web site design will be reviewed in detail by our analysts and the features you need will be smoothly integrated to the available scheme.

Don't miss the most exciting new media of the millennia. Allow your company to reap the benefits of the Internet. Have your product or service available 24/7 to millions. Have you heard about all those programs that claim you can learn foreign languages or other knowledge while you sleep? Well, the Internet is truly a vehicle that can allow you to earn while you sleep! Whether you want an intelligent design within reach at cost effective web design pricing, or a large corporate web site design featuring marketing strategies, product branding or web site optimization for the search engines, we'll gladly discuss how our web design firm can work with you to create the results you want!"

**[http://www.eimpressions.com.au/graphic\\_design.php](http://www.eimpressions.com.au/graphic_design.php)**

"Benefit from our compelling graphic design at the most economical pricing possible. We provide the best graphic skills to fit your budget, and we guarantee your newly designed project will also meet your print budget requirements and presentation needs."

We understand that the bottom line is not just to make your product or service look great, but that it must sell your product or service. Moreover, we respect the importance of a solid corporate branding strategy and can incorporate your corporate logos and other key branding elements in the printed materials we produce for you.

**<http://www.legraphics.com/services/print-branding.html>**

"Our approach to corporate branding transforms the way companies conduct business. We use objective measures and proprietary methodologies to create superior brand designs. We analyze critical data that allows us to relate branding efforts to impact the bottom line.

- We work to ensure your completed graphic design work is exactly what is required — not just its overall look and presentation, but that it will be cost effective to produce: competitively priced design within reach. This is our guarantee to you!
- We verify that the size of your piece, bindery specifications, color (s) utilized, printing formats, and all other print specifications our designers utilize are in your best interests.
- We can even set up your files to take advantage of the most cost-effective way of outputting film (whether as printer's spreads or complete press-ready signatures that can lower your stripping costs at printing time)."

"....what makes an effective web presence?"

- Compelling graphic design, whether programmed in HTML, Java, JavaScript, or Flash technology.
- Quick download times. Effective "behind the page" information coordinated with your pages' content, in order to help your rankings with the major search engines.
- A dynamic sales presentation. Most companies can describe technical aspects of their product or service but fail to describe its benefits and why you should purchase it.
- A professional server to ensure reliable 24/7/365 operation and excellent response times.
- Your own unique domain name to help people find you among all the other web sites in the world.
- Your e-mail addresses should have the same domain name, helping achieve wider brand recognition and a consistent corporate identity.

- A web design company that can deploy effective web page designs tailored to your specific objectives, one that can create web graphics and web page designs that help to amplify all your web-marketing efforts.”
- Visual design and writing style that reinforces your corporate branding strategy.
- Your corporate identity is important at all times, but branding is even more important, in online marketing plans, than in printed advertising, especially when eCommerce, eBusiness, or any personal or private information is involved.
